

Telecare LIN eNewsletter **June 2010**

Final booking for 30 June event

Welcome to the June 2010 newsletter. The Telecare Learning and Improvement Network (LIN) is responsible for providing general implementation support to organisations building their telecare and telehealth programmes in England. Registered DH Care Networks telecare membership is around 6300.

All telecare newsletters are archived at:
www.dhcarenetworks.org.uk/telecarenewsletters

If you are an organisation implementing telecare or telehealth in England and have an interesting local telecare or telehealth story for inclusion in a future newsletter then e-mail Mike Clark at telecare@dhcarenetworks.org.uk

Headlines for June 2010

Item 1 The Social Care Institute for Excellence has published a report on telecare and ethics that will be of interest to organisations implementing telecare.

Item 2 The seventh in a series of eight events to disseminate the initial learning from the Whole System Demonstrator Programme and showcase regional programmes will be held on 30 June 2010 in Newcastle Gateshead. Some places are still available.

Item 3 Registration is now available for the NHS Expo in October 2010.

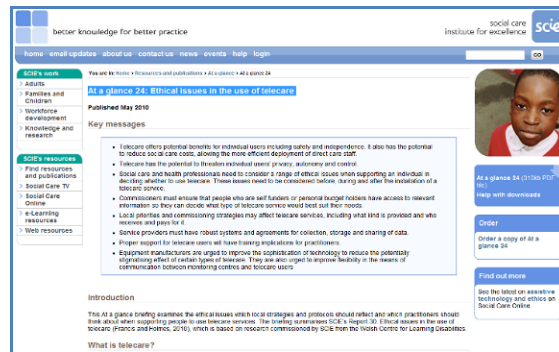

Item 4 A comprehensive list of news and links is available since the last newsletter in early April.

Item 5 A list of upcoming events and conferences is available.

Note: *DH Care Networks is not responsible for the content of external links and does not endorse any suppliers or their products. Any claims made by organisations should be carefully evaluated as part of normal commissioning and procurement arrangements.*

1 Ethical issues in the use of telecare – new publication from SCIE

The Social Care Institute for Excellence (SCIE) has published a new report on 'Ethical issues in the use of telecare'.

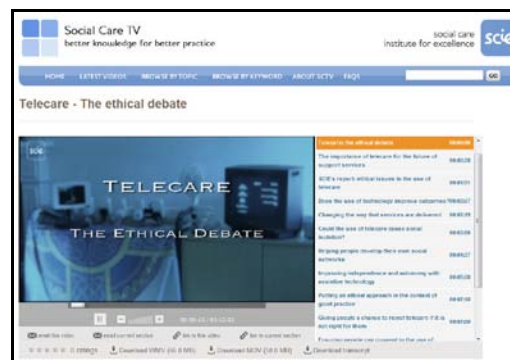

<http://www.scie.org.uk/publications/ata glance/ata glance24.asp>
<http://www.communitycare.co.uk/Articles/2010/05/07/114435/Ethical-issues-in-the-use-of-telecare.htm>

2 Whole System Demonstrator Action Network (WSDAN) – Newcastle event – booking still available (30 June 2010)

Prepared by Mike Clark

Booking is still available for the Newcastle event on 30 June 2010. This is number seven in a series of eight events to disseminate the learning from the WSD programme and showcase progress on telecare and telehealth around the UK.

Tim Ellis (WSD Programme Manager) will be providing an update on the trial across the three sites and introducing video case studies as well as a new briefing paper on innovation in telecare and telehealth. **Professor Martin Knapp** from the London School of Economics will be presenting on 'Telecare and telehealth - economics issues'. **Moira Mackenzie** from the Joint Improvement Team will be covering the Scottish Telecare Programme. **Jim Greer (JIP Project Manager)** and colleagues will be providing an update on the North East Improvement and Efficiency Partnership telecare programmes. **Jonathan Thorpe** will be presenting on developments around the University of Hull's Telehealth Centre and providing an update on the heart failure work being carried out. **John Eaglesham** (Advanced Digital Institute) will provide an update on an Assisted Living Innovation Platform (ALIP) Project which has been undergoing user testing and there will be an update on the SHA programme in Yorks and Humber. **Michael Dillon** from the NHS Technology Office will demonstrate the standards based approach sharing Telehealth information with GPs and other clinical users.

Booking arrangements for 30 June 2010 at the Newcastle Gateshead Hilton can be found at the following link: <http://www.dhcarenetworks.org.uk/events/>

If you are registered with the [WSDAN web site](#), you can get monthly newsletter information about features and presentations from previous events. The site also hosts the searchable evidence database for telecare and telehealth with over 340 journal articles.

Evidence database: <http://kingsfundlibrary.co.uk/wsdan/>

Cornwall event - On the 22 and 23 June NHS Cornwall and Isles of Scilly and Cornwall Council are hosting a Self Care & Whole Systems Demonstrator conference. It's a 2-day event, looking at specific Self Care projects in Cornwall, and the Whole System Demonstrator on the second day, of which Cornwall is one of the three national trial sites. The aim of the event is to raise awareness about self

care, the relevance to health and social care professionals, and to reinforce the links between personalised care planning, self care and improving quality and outcomes for patients.

They will be having both national and local speakers. The event is being held at the Headland Hotel in Newquay. Please send an e-mail to: wsd.conference@cornwall.nhs.uk if you are interested in attending. (Please note there is a charge for this event).

3 NHS Expo

Registration is now available for the NHS expo in October 2010. Readers will recall the successful 'Innovation House' at the July 2009 Expo. Planning is underway for telecare and telehealth to be featured again this year at the Expo.

(Note: there is a charge)

Ethical issues in the use of telecare (SCIE)

The screenshot shows the SCIE (Social Care Institute for Excellence) website. The main content area features a page titled "At a glance 24: Ethical issues in the use of telecare", published in May 2010. The page includes a list of key messages and an introduction. The key messages are:

- Telecare offers potential benefits for individual users including safety and independence. It also has the potential to reduce social care costs, allowing the more efficient deployment of direct care staff.
- Telecare has the potential to threaten individual users' privacy, autonomy and control.
- Social care and health professionals need to consider a range of ethical issues when supporting an individual in deciding whether to use telecare. These issues need to be considered before, during and after the installation of a telecare system.
- Commissioners must ensure that people who are self-funders or personal budget holders have access to relevant information so they can decide what type of telecare services would best suit their needs.
- Local priorities and commissioning strategies may affect telecare services, including what kind is provided and who receives and pays for it.
- Service providers must have robust systems and agreements for collection, storage and sharing of data.
- Proper support for telecare users will have training implications for practitioners.
- Equipment manufacturers are urged to improve the construction of technology to reduce the potentially stigmatising effect of certain types of device. They are also urged to improve flexibility in the design of communication between centres and telecare users.

The introduction states: "This At a glance briefing examines the ethical issues which local strategies and processes should reflect and which practitioners should think about when supporting people to use telecare services. The briefing summarises SCIE's 'topical' At a glance issues in the use of telecare. Practice and Policy, 2010, which is based on research commissioned by SCIE for the 'Local Centre for Learning Disabilities'."

Cellular scale enables autonomous weight tracking

<http://www.mhealthupdate.com/?p=944>

Why you'll love your eScale

We hear promises about needing weight loss goals every day, but most of these programs are lacking real facts and figures. We are taking this to a whole new level where only measurable results count. Promises about weight loss are history.

Scale of the future

The BodyTrace eScale and Vibrate is a complete package for all of you who take their health seriously. By tracking your weight you can ensure a healthy lifestyle and your fitness or weight loss goals can be achieved in an efficient way.

The eScale is a bathroom scale that wirelessly uploads and displays your weight & BMI at the BodyTrace Vibrate.

EASY TO USE! IT JUST WORKS.
NO SOFTWARE, NO CONFIGURATION!

Proven method

Tracking your weight to proven to help you lose weight and keep it off.

While common bathroom scales only show your current weight, the smart innovation of the simple bathroom scale displays your ever-changing weight online without any configuration. You can monitor the changes and take action when needed.

The battle with the yo-yo weight gain can finally be eliminated and the attaching weight loss tool can become your personal weight manager.

The advertisement includes an image of the eScale bathroom scale and a line graph showing weight fluctuations over time. The graph has data points for 215.8 lb, 219.4 lb, 204.2 lb, and 199 lb, with a red arrow pointing to the 219.4 lb peak and a green arrow pointing to the 199 lb low.

Diary for telecare and telehealth events and conferences

June

Cornwall event - On the 22 and 23 June NHS Cornwall and Isles of Scilly and Cornwall Council are hosting a Self Care & Whole Systems Demonstrator conference. It's a 2-day event, looking at specific Self Care projects in Cornwall, and the Whole System Demonstrator on the second day, of which Cornwall is one of the three national trial sites. Our aim is to raise awareness about self care, the relevance to health and social care professionals, and to reinforce the links between personalised care planning, self care and improving quality and outcomes for patients. They will be having both national and local speakers. The event is being held at the Headland Hotel in Newquay. Please send an e-mail to: wsd.conference@cornwall.nhs.uk if you are interested in attending.
